

# Multiplication Worksheet Helps

In this mini packet, you will find printables to help your children as they work through multiplication and keep their numbers in the correct columns.

While our older children are able to use graph paper for their math, our youngest struggles with his penmanship size and also the graph paper doesn't help him quite enough. With the following pages, he is able to use the sheets over the course of a few days to work through problems (he can note the problem number next to his work), and be reminded of where the numbers go. There are several sets included (also including zeros to remind children where to place numbers).

Problem # 5				7	1	
				9	8	2
	X		2	9	2	8
		2	7	8	5	6
	1	1	9	6	4	0
	8	8	3	8	0	0
	9	1	1	2	9	6
