SUDOKU PUZZLES

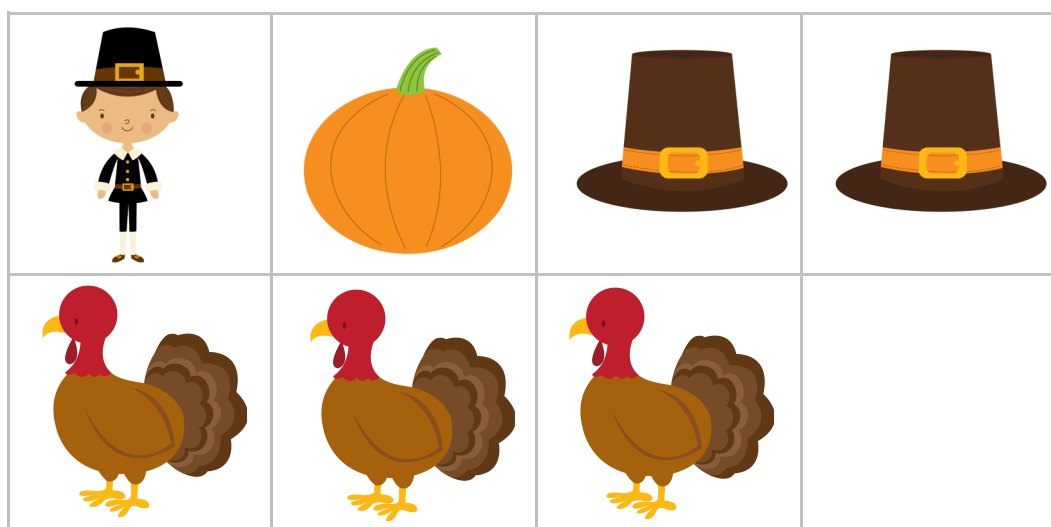

Directions:

1. Each blank spot on the Sudoku puzzle needs to be filled with one of the four pictures. Every row on the puzzle board should contain each of the four pictures. Each of the columns should also have one of the pictures. Each of the four squares will also have each one of the pictures.
2. Try to figure out which pictures are missing from the board. Work within the squares to see what image should be placed, or you can work on individual rows {horizontally or vertically} as well. Remember that no picture will be in a square twice or in a horizontal or vertical row twice.
3. Have fun solving!
4. Solution are located on a single page for those who need a little help. :)
